Ahmad Dalleh Backend Developer (.NET)

ahmeddalleh8@gmail.com | +971557487498 | Dubai, UAE

https://www.linkedin.com/in/ahmad-dalleh-659304382/ | https://github.com/AhmadDalleh

Professional Summary

Backend Developer with hands-on experience in building scalable and high-performance backend solutions. Skilled in API development, ASP.NET Core, Entity Framework Core, SQL Server, Redis caching, and Domain-Driven Design (DDD). Strong knowledge of microservices, RESTful API design, and CI/CD pipelines using Azure DevOps. Passionate about delivering reliable enterprise applications with a focus on performance, scalability, and maintainability.

Skills

Backend Development
ASP.NET Core, Entity Framework Core, ABP Framework, RESTful APIs, DDD, Dependency Injection, Database Optimisation

Methodologies
Microservices, Agile/Scrum, SDLC

Databases & Caching
SQL Server, Redis, MySQL, PostgreSQL

Testing
Unit Testing, Integration Testing, Blackbox Testing

Programming Languages
C#, Java, Python, C++

Soft Skills
Problem-Solving Skills & Analytical Thinking, Teamwork & Collaboration, Attention to Detail, Strong Communication Skills, Continuous Learning & Adaptability, Independent & Self-Motivated

Tools & Platforms
Azure DevOps, GitHub, Swagger, Postman

Professional Experience

| 01/2023 – 09/2024 | **Back End Developer** | Damascus Syria |

Oswa Tech ⬈

- Developed and maintained high-performance backend systems for an e-commerce platform using ASP.NET Core, Entity Framework Core, and SQL Server.
- Designed efficient APIs and managed data with SQL Server, enhancing overall application performance.
- Utilised Redis caching for improved API response time and database query optimisation, reducing latency by over 40%.
- Collaborated with cross-functional teams to ensure seamless integration of web applications.

| 05/2024 – 08/2025 | **Additional Experience – QA Tester (Part-time)** | London, UK |

Marmaz Tech ⬈

- Conducted comprehensive integration and unit testing to ensure software quality and reliability.
- Collaborated within an Agile Scrum environment, enhancing team productivity and project delivery.
- Implemented Blackbox testing techniques, improving user experience by 30%.
- Refined QA processes, reducing testing time by 25%.

Projects

E-Commerce Backend (Based on nopCommerce Architecture)
- Designed a modular backend system inspired by nopCommerce, covering products, orders, customers, and payments.
- Applied layered architecture with DDD principles for scalability and maintainability.
- Integrated Redis caching and RESTful APIs, deployed on Azure Cloud.

Tech Stack: ASP.NET Core, ABP Framework, EF Core, SQL Server, Redis, Swagger, Azure

Dynamic Research Content Management System
- Secure admin dashboard for adding and managing research content dynamically.
- Authentication, authorization, and role-based access control implemented.
- Optimised SQL Server queries and deployed using Azure Cloud Services.

Tech Stack: ASP.NET ⧉ Core, EF Core, SQL Server, TinyMCE, ABP Framework, Azure

Education

10/2020 – 08/2025	**Bachelor's Degree in Software Engineering** *Yarmouk Private University*	Damascus ,Syria
